DIGITAL CARTOONING
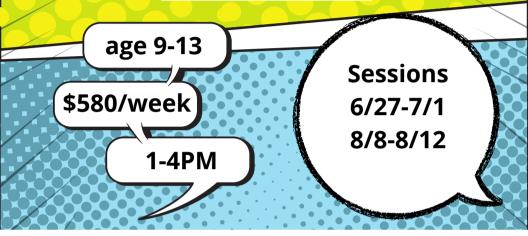

By STEAMBotics

age 9-13

$580/week

1-4PM

Sessions 6/27-7/1 8/8-8/12

Superheroes Unite! In this exciting Digital Cartooning class, students will combine literary, art, photography, coding and Lego kits to create their own digital comic book using specialized software. Each day students will learn the process of storyboarding, designing, building, photographing and writing their pages to build a digital comic book that will be printed and sent home at the end of the week. This course provides a project based and problem-solving approach to learning art and design concepts. This class is intended for students that are interested in art, literacy, coding and game design. Level up with STEAMBotics!

Instrutor Eva

As the owner of STEAMBotics and a certified LEGO Academy Trainer, Eva understands how to share that passion with young people. She truly loves teaching LEGO robotics programs, computer programming, engineering, and more to learners of all ages.
